Lots of light,
not much lamp

Erno Gold

AETHER S

Aatismo

Aether is a suspension lamp designed to bring magical and sophisticated ambiance to any environment. Its design combines craftsmanship and innovation. The diffuser is in transparent glass, housing a delicate handmade Japanese organza petal, illuminated from the top by a led engine. Aether S is the new small size of the family, now available also in new colour variations of the inner petal, offering stunning visual effects.

Technical data

Light source power 5W

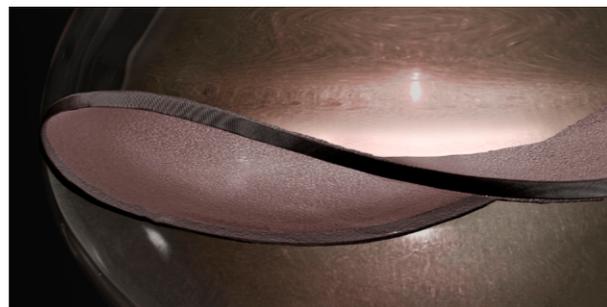

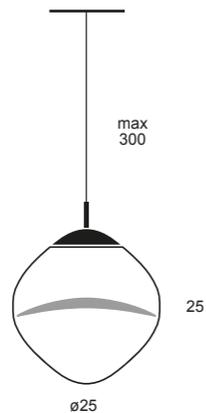

Emitted flux 450lm (3000K)

CCT 2700K / 3000K

CRI >90

Petal finishings

- White
- Aquamarine Green
- Coral Pink
- Moka Brown
- Deep Fuchsia
- Deep Blue

ONDU

Marco Acerbis

Ondu is an indirect light wall lamp made from a single solid block of aluminium, realized with CNC machinery. Its undulating shape transforms a geometric element into an object with strong architectural connotations. Its opposing arched profiles create a fascinating encounter of curves and straight lines. All profiles are sharp and angular, and create sinuous spatial lines. The light emitted upwards offers a strong and large lighting beam on wall and ceiling.

Technical data

Light source power 18W

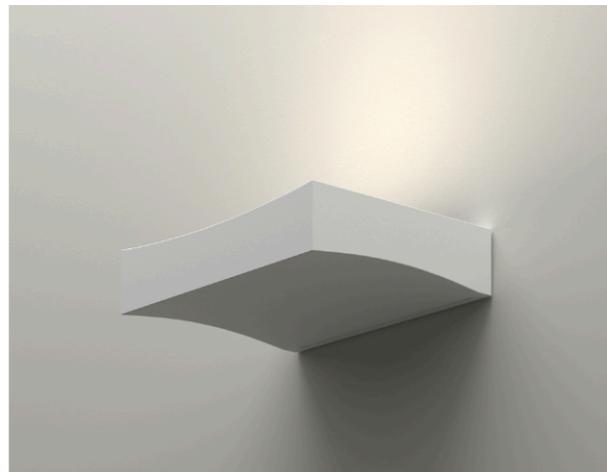

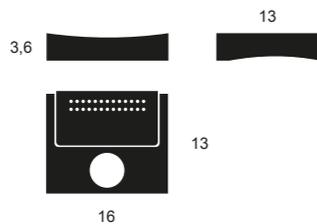

Emitted flux 1800lm (3000K)

CCT 2700K / 3000K

CRI >90

Finishings

- Matt White
- Anodised Black
- Anodised Brass
- Anodised Aluminium
- Brushed Nickel

ANIMA collection

Jean-Michel Wilmotte

Anima Bedside table lamp

Anima Lounge floor lamp

Anima collection is enriched with two new versions: Anima Bedside and Anima Lounge. The whole family features an aluminium body housing a LED engine with dedicated optics. The opal glass diffuser (with the photo-etched steel outer rim) creates a soft, comfortable light. A brushed steel stem is set on a base framed by an anodised ring. Anima is made with the same meticulous construction of all Lumina lamps.

Technical data (bedside)

Anima Lounge

GALILEO MINI

Emanuele Ricci

Smaller version of the icon Galileo lamp, this suspension offers a similar appearance to the original, but with a different type and colour of the glass. The mount consists of a CNC-machined aluminium support that houses a LED engine, and a transparent Bohemian crystal glass diffuser. The end result is a small jewel of quality that creates magic in the environment when illuminated.

OPUS collection

Walter Monici

Opus floor lamp

Opus Parete wall lamp

Lumina restyles Opus and Opus Parete. Indirect LED light lamps whose distinguishing feature is the directionality of the projector and the very high level of light emission thanks to a high-performance LED plate developed by Lumina. Opus and Opus Parete are the perfect solution to light up large spaces in both contract and residential settings.

Technical data

Light source power 50W

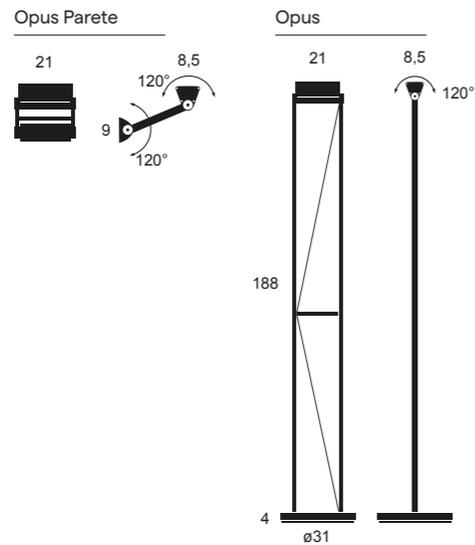

Emitted flux 7180lm (3000K)
