

# Aether S Modular

Aatismo, 2025

Last release - 2026, May

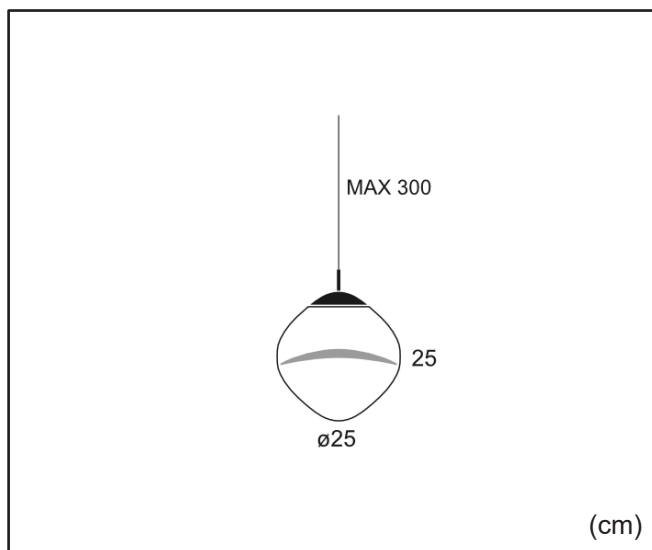

Small version of the family, Aether S is a suspended modular lamp with an original shape made of transparent borosilicate glass, housing a soft petal made of organza fabric. The LED engine at the top of the black mount directs the light downwards to the petal, that gets illuminated and diffuses the light.

*The lamp requires a ballast properly set provided in Lumina ceiling roses, or purchased separately and installed remotely.*
